

## Annual International Training Program on Multidisciplinary Care in Dentistry

Faculty of Dentistry

Prince of Songkla University, Songkhla, Thailand

---

1. **Course Title:** Multidisciplinary Care in Dentistry
2. **Course Duration:** On-site 32 days (During 21 April – 22 May 2025)
3. **Background:**

### **Thailand International Cooperation Agency (TICA)**

TICA is a national focal point for Thailand's international development cooperation. It was established in 2004 to realize Thailand's aspiration to be a contributor to international development cooperation. Believing that global challenges are best addressed through international cooperation and global partnership, TICA continues to work closely together with its development partners to realize the global development agenda through various capacity-building and human resources development programmes. In response to the recent changes in the global landscape of development cooperation, TICA has strengthened its partnerships to harness the synergy of South-South and Triangular Cooperation to tackle global development challenges, including expediting the implementation of Sustainable Development Goals (SDGs). It also continues to realign our focuses in order to deliver Thailand's commitments as a global reliable partner.

Since 1991, TICA, in collaboration with educational institutions in Thailand, has offered short-term training courses under its Annual International Training Course (AITC) programme. The number of courses offered each year varies between 25 to 35 courses for 20-35 participants per course. AITC not only fosters good and friendly relations which Thailand has already enjoyed with recipient countries across regions, but also helps Thailand to reach out to those countries with which we desire to engage more closely. The courses offered by TICA in 2023-2025 are categorized into 5 themes: Sufficiency Economy Philosophy (SEP), food security, climate change and environmental issues, public health, BCG Model related.

### **Organization/Institution:**

The Faculty of Dentistry, Prince of Songkla University (PSU) was established on the 10<sup>th</sup> of November 1983. Its creation was intended to serve the government policy of decentralizing dental service to communities in districts and provinces as well as to reduce the incidence of oral diseases.

Our vision is to be “A Smart Dental School for the Benefit of Mankind”. Our mission is to ensure patient satisfaction, service quality, innovations, research and network building to enhance oral health. We mainly endeavor by emphasis on holistic patient care, integrated departments, and the distribution of new general information and technology as well as to creating innovations in oral health care and strengthening networks and teamwork

The Faculty of Dentistry, PSU provides opportunities for all students to practice a multidisciplinary treatment approach supervised by an experienced dental team and to gain experience through research projects, which leads to the application of a scientific method to a situation in relevant subjects.
