The concept of Sufficiency Economy Philosophy (SEP)

Development according to the concept of sufficiency economy It is development that is based on the middle path and carelessness with regard to modesty, rationality, self-immunity. As well as use knowledge, prudence and morality in planning, making decisions and actions

Philosophy of Sufficiency Economy There are 5 main parts to consider:

1. **Conceptual framework** It is a philosophy that guides existence and behaves the way it should be. It is based on the traditional way of life of Thai society. Can be applied all the time. And is a systematic view of the world that is constantly changing

Focus on escaping disasters and crises For stability and sustainability of development

2. **The characteristic** of sufficiency economy can be applied to self-practice in

At all levels with an emphasis on practice on the middle path And step by step development

3. **Definition** of Sufficiency must consist of 3 attributes simultaneously as follows:

1. **Modesty:** Refers to a fit that is neither too small nor too much without They persecute themselves and others, such as production and consumption at a moderate level.

2. **Rationality:** Refers to a decision about the level of self-sufficiency. Must be logically By considering the factors involved as well as taking into account the expected consequences of such actions carefully.

3. **Good Immunity:** Refers to being prepared to be affected and to Various changes to occur taking into account the possibility of the situation. Things that are expected to happen in the near and far future

4. The conditions of decision making and the implementation of various activities at a sufficient level requires both knowledge. And morality is fundamental, that is,

- Conditions of Knowledge: Contains knowledge about various academic subjects involved.

All-round prudence to bring those knowledge into consideration in connection with For planning And caution in the process

- Moral conditions: to be reinforced, consisting of Have an awareness of virtue have honesty and patience, perseverance and use of intelligence in life.

5. **Practices / expected results.** The result of applying the philosophy of sufficiency economy is a balanced and sustainable development.

Ready to accept changes in all aspects In terms of economy, society, environment, knowledge and technology

5

How important is the Sufficiency Economy Philosophy (SEP)?

Sufficiency Economy Philosophy There is a central path, or sufficiency. This is consistent with the UN's development methodology that values people. It is considered the center of development. And promote a sustainable development process This will eventually lead to human development. Six recommendations for the development of people according to the principles of the sufficiency economy of UNDP (from the 2007 Human Development Report of Thailand Sufficiency Economy and Human Development). United Nations Development Program in Thailand) is as follows

1. Sufficiency economy is a philosophy of vital importance for eliminating poverty and reducing the economic risks of the poor.

2. Sufficiency economy philosophy is the foundation of community empowerment and the development of strong community potential as the foundation of national development.

3. Sufficiency economy enhances corporate social responsibility. By creating a business practice that emphasizes long-term profitability in a competitive context.

4. Sufficiency economy principles are of great importance for improving the standards of good governance in public administration.

5. Sufficiency economy philosophy can be used as a guideline in formulating national policy. To build immunity to situations that come to hit suddenly To improve various policies to be more appropriate And to plan strategies for promoting equitable and sustainable growth.

6. To cultivate a self-sufficient consciousness. A change in values is needed. And people's ideas to facilitate the development of people It can be seen that the sufficiency economy philosophy is universal. And can be applied to various matters.
