

Course Outline

Online International Training Course via Zoom Meeting

1. Course Title:

Oral Health and Health Promoting in School Setting and Community

2. Duration:

7 Days (7 – 11, and 14 – 15 February 2022)

3. Background and Rational:

TICA: Thailand International Cooperation Agency

TICA is a national focal point for Thailand's international development cooperation. TICA was established in 2004 to realize Thailand's aspiration to be a contributor of development cooperation. Believing that global challenges are best addressed by international cooperation and global partnership, today we continue to strengthen our contribution to achieve global development agenda through various capacity-building and human resources development programmes. In response to the recent changes in the global landscape of development cooperation, especially through the concept of South-South and Triangular Cooperation, TICA continues to realign our focuses in order to deliver Thailand's commitment to be a relevant partner in global agendas including the 2030 Agenda for Sustainable Development.

The Department of Health

Ministry of Public Health, which is the main organization to take care of health promotion and environmental health systems to ensure people's good health, has mission on analyzing information and situations to formulate policies and design health promotion and environmental health system through cooperation, networking, and monitoring to ensure responsible implementation. The capacity building for doctors and public health personnel on preventive medicine aims to enhance the knowledge and expertise to support their personnel to become leaders in health promotion who can lead people to have the abilities to take care of their own health which will result in sustainable self-reliance healthcare.

Program overview

This course will provide the trainees for their understandings of health promotion concepts and how to apply the concept into activities. They will learn from lecture and exchanging knowledge with experts and local personnel. They will learn how to promote healthy environment and control unhealthy factors in schools and community. For trainees who are working in dental health field will get some demonstration of “SMART technic” the dental caries prevention using glass ionomer.
