THAILAND'S GREAT TURNAROUND

This is a year in which Thailand made headlines. For two months, worldwide media attention focused on the country's political turmoil. That turmoil, however, was actually limited to very few locations and affected relatively few people. Nonetheless, the images, video footage and stories were unarguably dramatic.

This year also saw another story unfold in Thailand. Although it received far less news coverage, it was arguably a more meaningful tale. It was the story of how Thailand's people, faced with a global recession that many experts predicted would inflict the most damaging economic crisis in its history, rallied together to push their country forward and spark one of the strongest rebounds ever seen. It's a story the Thai people are rightfully proud of, and one they would like to share with you.
