## OPEN CALL!

# The ASEAN Science and Technology Fellowship 2018/2019

The ASEAN region boasts strong skills and potential in science and technology. However, few non-governmental scientists are consulted by ASEAN Member State (AMS) governments on policy decisions, and these scientists generally have a limited understanding of the government decision-making processes and how to effectively engage with the decision makers.

**We invite all early and mid-career scientists who are citizens and residents of AMS to contribute knowledge and analytical skills to help national governments.**

Join the our year-long Fellowship today, if you are an ASEAN national under 45 years of age as of April 20, 2018, have a minimum of master's degree in science or technology, and fluent in English. Attractive benefits await.

Fellows will be hosted by sectoral or line ministries or other agencies within their home countries that support technical work in the following 3 priority areas:

- Climate Change
- Sustainable Energy
- Science, Technology, and Innovation Policy

### Benefits

- A monthly stipend of \$1,200
- Capacity building and mentoring
- Participation in the 2018 ASEAN Committee on Science and Technology (COST) meeting in the Philippines and support for conferences

### Inquiry

For further information, please send inquiries to [ASEANScienceFellows@aseanfoundation.org](mailto:ASEANScienceFellows@aseanfoundation.org)

### APPLICATION DETAIL

Find out about the documents you need to prepare and selection criteria you need to know to take part in our fellowship.
