

Dear Sir/Madam

I have seen your advertisement for part-time staff at a summer camp for homeless children.

I'm interested to work there in any position, such as take care and support children or teaching science subject.

I graduated in Bachelor degree of science from Mahidol University. I had taught science subject to student in preliminary school. They had a lot of activities, powerful and imagine. I liked them when they thought about something. I couldn't think about that. In addition, I had took care homeless children in Parkred Camp about 1 month between summer before I graduated from University. I like children and want to see them grow up with good health, good activities and good experience to be a good person.

I'm really want to work with you in any position as mentioned above. I already attached my resume with this letter.

I'm look forward to seeing your contact back.

Sincerely yours,

Narumol
